

Architecture and Interior Concept

'An Exotic Smart Concept' is a conclusion of our project design. Semi-minimalist architecture is our solution as it provides a very simple architecture and interior which has a balance with surrounding nature. To complement with architecture style, a smart interactive between staff and guests is added up to ensure that the right combination of both facilities and staff will create a perfect blend of the project.

As for atmosphere within the Project, we set a tone of feeling to be a cool smart-relaxing place with attractive appearance and interesting theme. Green from grass in our garden decorated with art pieces and sculptures will be key element for our landscape. White theme of the building by the beach, a vivid red swimming pool overlooking to the sea and grey tone of the Restaurant – these are visualized overview concept of the Project.

Highlight of the project is **'The Library Building'** located by the beach named itself after the project's title. The White building with high huge ceiling equipped with glass window pane all around will enrich purity, serenity and peace.

The Library Building consists of three box-style units adjoining together where the middle box is an open-air serving as a mini-café. The other two boxes are the huge library for not only books but also other entertainment media such as music CD, movie DVD. In addition, there will be a small corner for internet access with broadband connection. Guests will enjoy sipping a cup of coffee, writing e-mail, listening to music with sea views.

Accommodation concept is to divide space equally between outdoor and indoor in both horizontal and vertical way. This idea was stemmed from simple concept that when holiday, people prefer to spend more time out in the open rather than staying in an air-conditioned box.

Consequently, each building unit will be built in a box style by emphasizing in increasing efficiency of space utilization vertically and horizontally. We provide more outdoor and open-air space in order to meet guests' preference.

Tirawan Songsawat : Project Designer

Tirawan has long been in decoration and interior for more than 10 years. Her reputation has been widely spread by word-of-mouth from her clients. Main attractive point of her works is related to old woods which subject to her belief that 'Simple décor doesn't mean there is no design'. Most of her clients show their appreciations to her work because of her talent in transforming simple materials to be art pieces with innovative style.

As for The Library Project, she acts as a Project Designer, initiating overall conceptual design and interior work as well as landscape within the project. Her inspiration for the project is based on her beliefs regarding the value of nature and happiness in life.

Tirawan has delivered a concept of 'The real happiness is not complicated at all' if we know how to utilize it. Basic simple things in life and existing natural resources are more than valuable in itself. We need only time and space to feel, touch, and treasure it.
