

Kasemtham Sornsong

Being a local resident of Ko Samui, he has learnt that during the past 10 years Ko Samui has been overcome by foreign chain companies and overseas investors. This was due to a high promising outlook of Ko Samui as one of the leading tourist holiday destination. Many investors considered the island as a gold opportunity to develop their projects. Kasemtham, therefore, has strong intention to establish something to be an icon of Ko Samui on behalf of a young Samui generation.

Consequently, an idea to preserve existing nature on his land as much as possible became his first priority. Later on contributing benefit and creating employment to local community are considered.

Apart from many successful businesses that Kasemtham has operated in Ko Samui such as Spa, a coffee outlet, a book shop, distributor of brand name accessories. He set his goal to fulfill his dream to be a resort owner by utilizing his legacy 4-Rai of land in the heart of a lively Chaweng Beach of Ko Samui.

His conceptual idea of the project is to establish a small size resort to be a trendy spot in Ko Samui. Not only a style of architecture but also a service concept would reveal a uniquely different character from other properties on the island. Each service outlet and accommodation area will be equipped with convenient facilities at the same time provide a touch of nature. This will ensure that our guests will enjoy their holiday with impressive memorable experience to get closer to nature.

With his belief that a unique design will create a unique lifestyle, 'The Library' will be the first exotic smart conceptual resort in Ko Samui.
